

## **Dr. Adrienne (Patti) Smith Promoted to Vice President of Medical Affairs at RegenesiS**

*Increased clinician awareness and adoption of Provant<sup>®</sup> Therapy*

Scottsdale, Arizona, February 1, 2012 -- RegenesiS Biomedical, Inc., a medical technology company that markets the Provant<sup>®</sup> Therapy System, announced today Adrienne (Patti) Smith, MD, was promoted to Vice President of Medical Affairs. Dr. Smith joined RegenesiS in July 2011 as Medical Director.

Since joining RegenesiS, Dr. Smith has increased clinician awareness and adoption of the Provant Therapy System. More patients in need were helped by extending reach into the medical community, and strengthening clinical education programs. Relationships with thought leaders enabled accomplishment of these community outreach programs.

“Patti made an immediate impact on attaining our key medical goals,” said Virginia Rybski, President and CEO of RegenesiS. “In her new role, she will advance awareness of Provant Therapy through published clinical manuscripts, developing clinical care protocols, and expanding our Speakers Bureau.”

Dr. Smith gained industry experience in her positions as Vice President and Medical Director at Kinetic Concepts Inc. (KCI), the marketer of the wound V.A.C.<sup>®</sup>, and Senior Medical Advisor at Diversified Clinical Services (DCS), the largest US wound care and hyperbaric oxygen company. Her academic appointments have included the University of Texas Health Science Center, Scott Air Force Base, and the Texas Diabetes Institute. She is a graduate of Duke University and Washington University Medical School. She served 10 years in the United States Air Force, both inside and outside of the continental United States.

### About RegenesiS Biomedical

RegenesiS Biomedical, Inc. is a privately held medical technology company focused on developing and marketing noninvasive regenerative medicine products. RegenesiS developed, patented, and now markets the Provant Therapy System. Our customers include health care facilities, acute care hospitals, long-term acute care hospitals, skilled nursing facilities, rehabilitation centers, home health care agencies, and wound care clinics.

### About the Provant<sup>®</sup> Therapy System

Provant uses pulsed radio frequency energy (PRFE) to facilitate reduction of the pain and edema associated with post-operative, superficial soft tissues.
