

DEPRESSION IS COMMON IN THOSE WITH BACK PAIN

Chronic pain and depression are common health problems

December 2016 Newsletter

In a recent issue of Spine-health, a featured topic was on how back pain can lead to depression. Chronic back pain sufferers are four times more likely to have major depression than the overall population. These patients often have a lessened ability to work, exercise, and interact with friends and family. You may find the complete article [here](#).

Relieving chronic pain may help relieve depression as well. Provant Therapy from RegenesiS Biomedical Inc. is a safe, non-drug pain management option to consider. Over 13,500 patients have treated with Provant. To learn more, please contact your RegenesiS representative, or visit www.regenesibio.com.
