

## VETERANS AFFAIRS (VA) ACCELERATES DEPLOYMENT OF NATIONWIDE OPIOID THERAPY TOOL

May 2015 Newsletter

Recently the VA Office of Public and Intergovernmental Affairs issued a news release on the Opioid Therapy Risk Report tool. This tool helps protect patients using high doses of opioids, or those with medical risk factors and are using opioids, by allowing providers to review pain treatment data in one place.

From the VA's news release: It includes information about the dosages of narcotics and other sedative medications, significant medical problems that could contribute to an adverse reaction and monitoring data to aid in the review and management of complex patients. VHA is actively deploying training aids to providers and facilities to familiarize them with how to utilize this tool in their daily practice.

You may read the VA news release [here](#).

Did you know? ...Over 10,000 patients have now benefited from non-narcotic Provant Therapy. The complete body of clinical evidence for Provant may be found [here](#). To learn more how RegenesiS Biomedical may help your patients and you, please contact your local representative, or visit [www.regenesibio.com](http://www.regenesibio.com)
