

## WE HELP ENSURE YOUR PATIENTS GET THE MOST OUT OF SAFE, NON-DRUG PAIN MANAGEMENT

### Patient Care Coordinators and the new Provant<sup>®</sup> Treatment Pad Positioning Pictorial are Resources for You

September 2015 Newsletter

Two of the ways RegenesiS Biomedical helps ensure your patients get the most out of Provant Therapy are our Patient Care Coordinators (PCCs) and the new treatment pad positioning pictorial.

PCCs are in routine phone contact with patients, including in-servicing for Provant use, and routine follow-up to provide support and answer any questions.

The new pictorial booklet shows options for comfortable treatment pad positioning. Tips are also included, such as using a rolled towel or pillows to help hold the treatment pad in place. The PCCs review this with patients. A few pictorial examples are shown here:

Over 11,400 patients have treated with Provant's **safe, non-drug pain management**. You may access several patient and clinician resources [here](#). To learn more, please contact your RegenesiS representative, or visit [www.regenesibio.com](http://www.regenesibio.com).

If you have colleagues that would like to receive these monthly newsletters, please forward this email to them; they may subscribe by emailing us at [newsletter@regenesibio.com](mailto:newsletter@regenesibio.com).

Sincerely,

Adrienne (Patti) Smith, MD

Vice President, Medical Affairs & Clinical Business Development
