

MEDICAL DEVICES OFFER NON-DRUG PAIN MANAGEMENT

Pulsed electromagnetic field therapy considered a “must-have device”

November 2017 News Update

Medical devices are increasingly becoming an adjunct or alternative to pharmaceuticals for pain management. Devices offer an excellent safety profile without the risk of addiction. The October issue of Practical Pain Management reviews the *Must-Have Devices for Your Pain Practice*.

A renewed interest in how to treat costly pain conditions has brought electromedical devices into the spotlight. This review article focuses on devices that demonstrate safety and clinical effectiveness, and patient satisfaction. A category noted as “must have” is pulsed electromagnetic fields (PEMF). RegenesiS Biomedical, which offers the dual-field Provant® Therapy System, was highlighted for the quality of research and development invested in PEMF.
