

March 2020 News Update

## PAIN TREATMENT THAT DOES NOT REQUIRE A CLINIC VISIT

### Consider a device that patients can use at home, which may help avoid a viral exposure

If your patients come in for consults for pain medication refills, consider prescribing Provant Therapy. Provant is a safe, non-drug, pain management device FDA cleared for home usage.

- Provant can be prescribed for up to 120 days without the need for repeat patient visits or new consults.
- With Provant, patients do not need to sit in waiting rooms for prescriptions, or at the pharmacy waiting for the medication. This may help avoid a viral exposure.
- RegenesiS Biomedical ships the device directly to the patient's home, and we have nurses who in-service them over the phone.
- For your patients already on Provant, perhaps extend their treatment time so they don't have to come in for a clinic visit for alternative treatments.

**Provant<sup>®</sup>**  
Therapy System

For postoperative pain relief, consider Provant<sup>®</sup> Therapy. Provant is dual-field electromagnetic therapy, proven in clinical trials and real-world patient experiences to provide meaningful pain relief and improved quality of life. To learn more, please contact your RegenesiS Biomedical representative, call 877-970-4970, or visit [www.regenesibio.com](http://www.regenesibio.com).
