

June 2020 News Update

PROVEN PAIN RELIEF PRESCRIBED VIA TELEHEALTH

Consider a device that patients can use at home,
which may help avoid a viral exposure

If your patients come in for consults for pain medication refills, consider prescribing Provant Therapy. Provant is a safe, non-drug, pain management device FDA cleared for home usage.

- Provant can be prescribed for up to 120 days without the need for repeat patient visits or new consults.
- With Provant, patients do not need to sit in waiting rooms for prescriptions, or at the pharmacy waiting for the medication. This may help avoid a viral exposure.
- Our procedures for product handling mandate that Patient Safety is Job #1. You may watch a video on our sanitation process [here](#).
- RegenesiS Biomedical ships the device directly to the patient's home, and we have nurses who in-service them over the phone.

- For your patients already on Provant, perhaps extend their treatment time so they don't have to come in for a clinic visit for alternative treatments.

Provant[®]
Therapy System

For postoperative pain relief, consider Provant[®] Therapy. Provant is dual-field electromagnetic therapy, proven in clinical trials and real-world patient experiences to provide meaningful pain relief and improved quality of life. To learn more, please contact your Regenesi Biomedical representative, call 877-970-4970, or visit www.regenesibio.com.
