A NURSE EDUCATOR AND PATIENT TALKS ABOUT HER EXPERIENCE WITH PROVANT[®] AND HER RECOVERY FROM TOTAL KNEE REPLACEMENT SURGERY

Patient Testimonial - Betty R. Clark, BSN, RN, MEd, CRRN

A REHABILITATION NURSE EDUCATOR:

“My first job was a staff nurse on a Neuro and Orthopedic surgical unit. Since then, I held many rehabilitation nursing positions throughout my long career. I started a part-time business 20 years ago as a freelance Rehabilitation Educator. I teach certification courses which motivate me to maintain the most current knowledge of the treatment modalities.”

HELPING PATIENTS ACHIEVE INDEPENDENCE:

“One major responsibility of a rehab nurse is to manage the patient’s pain level, this enables interventions and treatments to be more effective and encourages the patient to achieve higher levels of independence and function. There are many options to utilize, but a long-term pain medication can lead to drug tolerance and addiction. Pain management is constantly changing and with the widespread opioid crisis, current treatments such as Provant have emerged as a non-drug device to decrease pain, swelling and inflammation.”

You may access the full video testimonial [here](#).

Provant[®]
Therapy System

For post-operative pain relief, consider Provant[®]. Provant is proven in clinical trials and real-world patient experiences to provide meaningful pain relief and improved quality of life.
