

QUALITY OF LIFE BEGINS WITH THE FEET

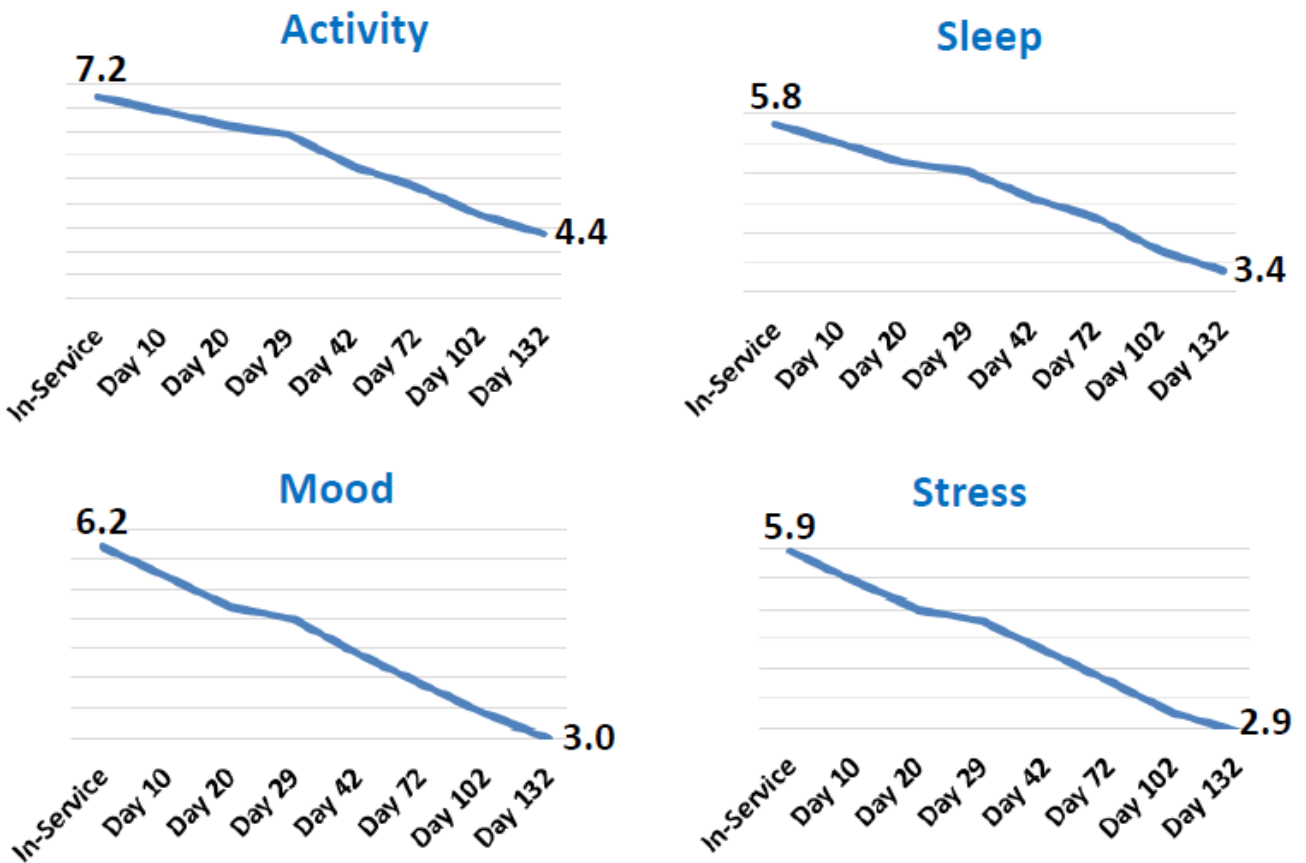

Improved Daily Activities • Improved Sleep • Reduced Pain

Provant is proven in real-world patients to reduce chronic post-procedural pain and improve quality of life. RegenesiS Biomedical has Clinical Nurse Coordinators who track patient outcomes using the Defense and Veterans Pain Rating Scale, including the biopsychosocial impacts of pain. The intent is improving outcomes in pain intensity and physical functioning.

Presented here are Provant patients who reported on the DVPRS related measures. Included are over 4,400 patients who reported pain scores. Over 1,500 patients also reported activity, mood, sleep, and stress scores.

Significant Improvements in the Biopsychosocial Impact of Pain

For post-operative pain relief, consider Provant®. Provant is proven in clinical trials and real-world patient experiences to provide meaningful pain relief and improved quality of life. To learn more, please contact your Regenesys Biomedical representative, call 877-970-4970, or visit www.regenesysbio.com.
