

March 2022 News Update

BACK TO WORK AND OFF DISABILITY AFTER RESOLUTION OF TOTAL KNEE REPLACEMENT PAIN

Case Report: Improved sleep, daily activities, range of motion, stress and mood with Provant[®] Therapy

Patient Details:

- 61-year-old male
- Persistent pain after total knee replacement
- Difficulty sleeping and walking, and hindered activities of daily living

Interventions and Outcome:

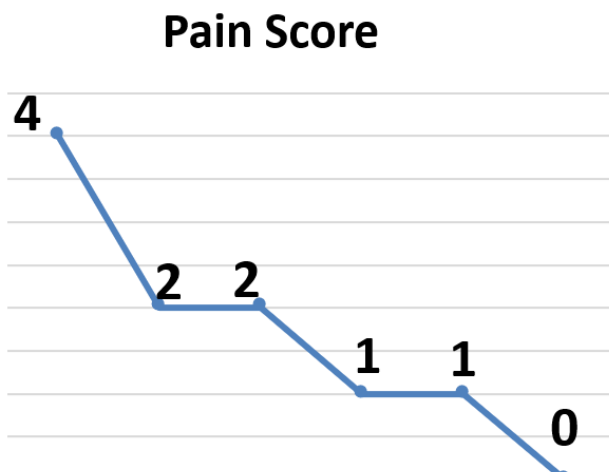

- Unable to exercise due to pain and limited range of motion
- Pain constantly 4/10 with spikes to 8/10

Alternative Pain Relief Intervention:

- Two months post-op, Provant[®] Therapy prescribed to reduce inflammation and pain
- After 1 month, pain reduced to 2/10, and 0/10 after 6 months

Conclusions:

- Improved sleep, activities, range of motion, stress and mood
- Patient is off disability and back to work
- "I'm able to be on the go all the time"

	Before Provant	After Provant
