

BACK TO WORK AND OFF DISABILITY AFTER RESOLUTION OF TOTAL KNEE REPLACEMENT PAIN

Case Report: Improved sleep, daily activities, range of motion, stress and mood with Provant[®] Therapy

August 2022 News Update

Patient Details:

- 61-year-old male.
- Persistent pain after total knee replacement.
- Difficulty sleeping and walking, and hindered activities of daily living.

Interventions and Outcome:

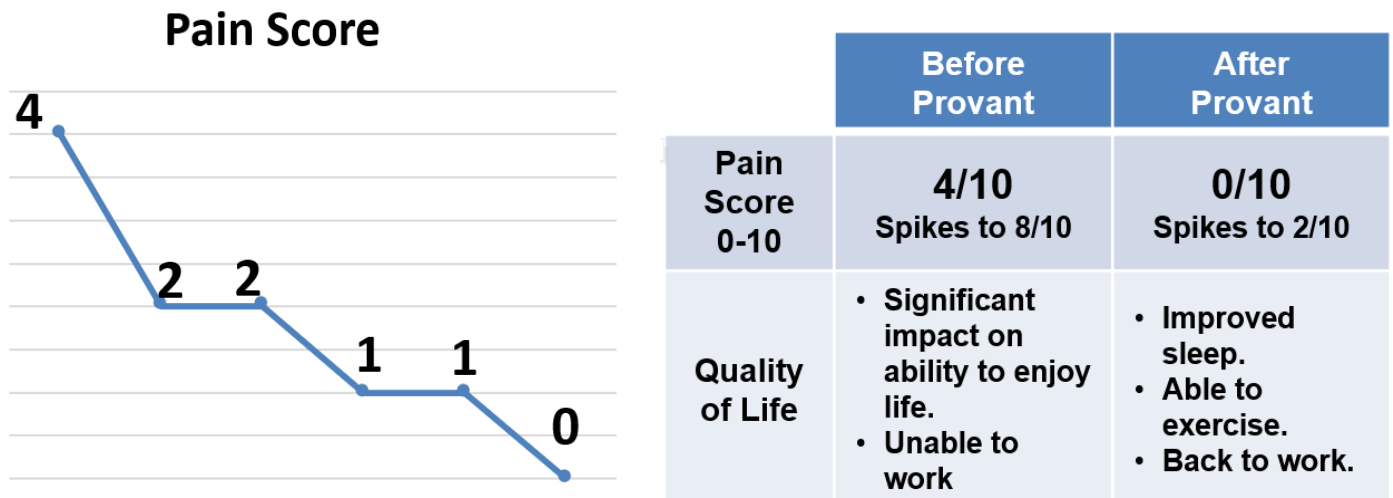

- Unable to exercise due to pain and limited range of motion.
- Pain constantly 4/10 with spikes to 8/10.

Alternative Pain Relief Intervention:

- Two months post-op, Provant[®] Therapy prescribed to reduce inflammation and pain.
- After 1 month, pain reduced to 2/10, and 0/10 after 6 months.

Conclusions:

- Improved sleep, activities, range of motion, stress and mood.
- Patient is off disability and back to work.
- "I'm able to be on the go all the time."
